Digital Negatives with Usage Rights

Package Options

Digital Negatives with Usage Rights - \$369.00

You obtain full usage rights to print your photos, along with the supporting documentation required by photo developing labs. Unlimited copies, reproductions and alterations can be made from your Digital Negatives, and the images can be used on an average home computer. All images are full resolution and can be printed in Black and White, Colour or Sepia (antique / aged black & white).

Also included is a Bonus Disc of Photographer Select Images. These are additional pictures - beyond the guaranteed minimum number of photographs included in your package.

Fine Art Presentation Book - \$690.00

Each Fine Art Presentation Book is unique, custom designed with pictures from your wedding day. Books are hardcover, professionally bound and measure 10x10 inches in size. To ensure that your investment will last for years to come, the cover is protected by a duplicate print dust cover jacket and hard protective case, and every page is printed using archival quality materials and protected with a matte laminate coating.

Note that selection of images to be included as well as design and layout of these books is a creative process and is done at the discretion of the photographer.

Parent Albums - \$195.00 (each)

A complete additional copy of your proofs are provided. Pictures are delivered in the same stylish, contemporary black leather finish album that came with the couple's proofs. These albums offer a nice alternative to traditional wedding photography albums and provide the perfect complement to our modern style photography.
